

2 Yard Solids Collection & De-watering Filter

RGF's Self-flushing 2 Yard Solids Collection and De-Watering Filter is designed to remove heavy solids from the waste stream and collect for disposal. Filters to 170 micron particle size. System requires lift truck for dumping. Available in two materials: aluminum for light weight collection, or carbon steel for heavy weight materials. Requires a below grade sump basin to be located under the filter to catch and transfer filtered water.

Specifications

Dimensions: 4'6"W x 4'4"H x 5'6"L

Construction:

Model: OP-026: Aluminum frame
Light Weight

Model: OP-47: A-36 carbon steel frame
Heavy Duty

Optional Sump Basin Assembly

OP-48 40 Gal Heavy Duty Sump Basin complete with 1/2 hp, 115 VAC, 9.8 Amp Sump Pump
